

Transforming Glucose Data into Personalized Learning for Behavior Change: The Healthcare Professional Opportunity with Reimagined Stelo Features

STELO GLUCOSE BIOSENSOR¹

Stelo's features help users and clinicians connect the dots between glucose, nutrition, activity, sleep and stress.

This creates opportunities for HCPs to guide more personalized education, experimentation, and self-management.

CLOSING THE GAP WITH KEY CAPABILITIES¹

Advanced Nutrition

Meal composition assessment
Frictionless logging

How am I doing today?

Personalized Intelligence

Coach + Insights woven throughout

Where are the opportunities?

Progress Over Time

Trends enables tracking in context of behaviors

What did I do to change the results?

BACKGROUND: STELO AS A BEHAVIOR CHANGE TOOL^{4,5}

Stelo: Insight-driven tool for supporting early behavior change and metabolic health

Strengthening understanding of glucose patterns and encouraging healthier eating and activity habits

Promoted accountability through continuous data

"I definitely think I make better food choices if I know I can see the numbers."

T2D No Insulin, Age 45-54 years, Female, White or Caucasian

Supported behavior change through iterative self-learning

"As somebody once said, you cannot improve what you do not measure... For me, that's the crux behind all of this. We can now have a measurement. I can see things in real time if I'm eating this, what happens? Or if I'm not eating, what happens?"

PreD, Age 65 – 74 years, Male, White or Caucasian

Motivated users through real-time learning of glucose patterns

Facilitated data-driven conversations with clinicians enabling medication adjustments and deeper engagement in care

STELO FEATURE HIGHLIGHT: TRENDS¹

What It Does: Shows how glucose and other lifestyle factors interact over time.

Clinical Practice Opportunity: Supports pattern recognition over time, enabling more meaningful discussions around habits, routines and individualized goal setting.

HCP Conversation: "Looking across the past few weeks, what lifestyle factors do you think may be influencing these trends?"

STELO FEATURE HIGHLIGHT GLUCOSE RESPONSE SCORE¹

What It Does: Connects meals to glucose response, evaluates rise, recovery, and overall glucose exposure.

Clinical Practice Opportunity: Provides support tool to move beyond generalized nutrition advice and guide data-informed personalized behavior change conversations.

HCP Conversation: "What difference do you notice between meals with similar carbohydrates but different protein or fiber content?"

STELO FEATURE HIGHLIGHT: COACH¹

What It Does: Health Coach is an AI assistant that provides personalized explanations and insights of how nutrition, activity, stress and sleep impact glucose to help support metabolic health.

Clinical Practice Opportunity: Educational resource between visits, supports problem-solving and experimentation.

HCP Conversation: "What insights has coach helped you notice about your meals, activity or glucose responses that you hadn't recognized before?"

*Responses by Health Coach are not intended as medical advice and do not replace users healthcare provider.

Incorporate CGM Into Your practice With The Dexcom Clinic Workflow
